PROFESSIONAL SUMMARY

Economics graduate with strong quantitative skills in statistical modeling, large-scale data analysis, and visualization. Experienced in processing complex administrative datasets in R, with expertise in Python ML and Tableau dashboarding. Comfortable across the full analytical pipeline — from data wrangling and modeling to communicating findings to non-technical audiences.

WORK EXPERIENCE

City of Boston – DOIT, Boston, MA

Sep 2025 – Dec 2025

Research & Evaluation Fellow

- Processed and modeled 1M+ stop-level ridership observations in R across 145+ MBTA bus routes (2017–2024); implemented a DiD estimator and applied k-means clustering to rider survey data to identify equity-relevant rider segments.
- Engineered a student-by-month panel from raw administrative records; estimated a DiD model with triple interaction terms for program evaluation.
- Aggregated BLS labor market data across 6 metros; visualized employment and wage trends in an analytical deck for city reporting.

Circadian Connect, Mumbai, India

Feb 2024 – May 2024

Research Intern

- Designed an automated data pipeline (Google Alerts-to-Sheets) tracking 5 research domains, eliminating 10+ hours/week of manual data collection.
- Synthesized 30+ academic papers on Digital Financial Inclusion across 7 Global South economies into a policy brief for a paid Kolabtree engagement.
- Co-developed data frameworks for 4 government tender proposals, including quantitative needs assessments and measurable performance indicators.

Aditya Process, Mumbai, India

May 2023 – Jan 2024

Operations Head

- Conducted an internal audit identifying P&L discrepancies; implemented data tracking and compliance protocols to eliminate reporting gaps.
- Managed operational data across inventory, AP/AR, and vendor records for 25+ staff; maintained Excel-based tracking for budget and procurement.
- Performed profit margin analysis across B2B contracts, identifying pricing opportunities contributing to a 15% increase in annual revenue.

Pratham Foundation, Remote

Sep 2021 – Oct 2021

Communications Consultant

- Administered 100+ structured household surveys using Pratham's ASER framework; compiled primary field data for national policy reporting.

ACADEMIC PROJECTS

Unsupervised ML & Data Mining | Northeastern

- K-means, DBSCAN, PCA, t-SNE, UMAP, neural nets on MNIST/20NewsGroups; LDA/NMF topic modeling, Word2Vec, collaborative filtering, MCMC sampling.

Applied Data Analytics for Economics | Northeastern

- Replicated Card (1990) and RDD studies; regression, logistic, decision trees, BLP demand estimation; web scraping (BeautifulSoup/Selenium).

Computation & Visualization | Northeastern

- Dashboards with Matplotlib, Seaborn, Plotly, Altair; OpenCV image processing; visualization critique and storytelling.

EDUCATION

Northeastern University, Boston, MA

Sep 2024 – May 2026

M.S. Economics | Minor: Data Science | GPA: 3.389

Courses: *Unsupervised ML & Data Mining, Data Analytics, Data Computation & Visualization, Econometrics.*

Research: "Demographics and Real Interest Rates Across Countries and Over Time" (Carvalho et al., 2025)

NMIMS, Mumbai, India

Aug 2020 – Apr 2023

BSc Economics | Minor: Finance

Courses: *Econometrics, Statistics, Mathematical Economics, Financial Economics.*

Research: "Global Economic Downturn of 2007" (2022); "Economics of Disasters" (2021)

SKILLS

Analytical: Statistical modeling, data wrangling, EDA, ML (K-means, DBSCAN, PCA, t-SNE, UMAP, neural networks), NLP (topic modeling, word embeddings), causal inference (DiD, IV, RD, PSM), panel data, time series, recommender systems, web scraping, visualization, predictive modeling. Tools: R (primary), Python (scikit-learn, NumPy, pandas, Matplotlib, Seaborn, Plotly, Altair, OpenCV, gensim, NetworkX, BeautifulSoup, Selenium), Tableau, Excel (advanced), Stata.

Languages: English, Hindi, Gujarati; learning Spanish via Duolingo.
