PROFESSIONAL SUMMARY

Economics graduate with direct experience managing P&L, financial controls, and commercial negotiations in a business setting, combined with a strong foundation in financial modeling, valuation, and quantitative analysis from academic training. Experienced in translating data-driven analysis into executive-ready deliverables. Seeking to apply analytical rigor and financial acumen to support investment research, strategy consulting, or financial analysis roles.

WORK EXPERIENCE

City of Boston – DOIT, Boston, MA

Sep 2025 – Dec 2025

Research & Evaluation Fellow

- Conducted a quasi-experimental impact assessment of the city's fare-free bus pilot program, analyzing 1M+ observations to estimate ridership effects; structured findings into a concise analytical deck for senior city officials — analogous to the research-to-recommendation workflow in strategy consulting.
- Benchmarked Boston's labor market against 6 peer metros using BLS employment and wage data; built a comparative analytical framework and delivered chart-driven insights for city economic planning, demonstrating ability to synthesize multi-source data into clear executive narratives.
- Designed and executed a program evaluation study using Difference-in-Differences methodology; translated complex econometric outputs into structured, non-technical findings for government decision-makers.

Aditya Process, Mumbai, India

May 2023 – Jan 2024

Operations Head (Family Business)

- Held full P&L responsibility for a manufacturing operation; managed cash flow forecasting, accounts payable/receivable cycles, budget planning, and vendor financing for day-to-day operations of 25+ staff.
- Conducted a comprehensive internal financial audit within 2 months of assuming oversight; identified unrecorded production lots and material P&L discrepancies, implemented financial controls and reporting protocols to close gaps and prevent future exposure.
- Led B2B client acquisition and commercial contract negotiations with clients including Pepe Jeans and D-mart India; performed margin analysis to structure deals achieving ~40% gross margins per bulk order, contributing to 15% annual revenue growth.

Circadian Connect, Mumbai, India

Feb 2024 – May 2024

Research Intern

- Co-developed 4 technical proposals for STEM-based government tenders, including budget frameworks, cost structures, and financial performance metrics; advanced to Round 2 for a neonatal health project.
- Conducted a comparative study on Digital Financial Inclusion across 7 Global South economies; synthesized findings into a policy brief for a paid client engagement.
- Designed an automated data monitoring pipeline (Google Alerts-to-Sheets), improving research workflow efficiency by eliminating 10+ hours/week of manual tracking.

Pratham Foundation, Remote

Sep 2021 – Oct 2021

Communications Consultant

- Administered 100+ structured household surveys to evaluate education program access; compiled field data supporting national policy research.
