## PROFESSIONAL SUMMARY

---

Economics graduate with applied experience in quasi-experimental research design, program evaluation, and primary data collection. Work spans transit equity, digital financial inclusion, and education access — with a consistent record of producing policy-relevant findings from complex administrative and survey datasets. Interested in research roles that bridge methodological rigor with real-world impact.

## WORK EXPERIENCE

---

### City of Boston – DOIT, Boston, MA

Sep 2025 – Dec 2025

#### Research & Evaluation Fellow

- Designed a Difference-in-Differences framework to evaluate the fare-free bus pilot (Routes 23, 28, 29); analyzed 1M+ stop-level ridership observations across 145+ MBTA routes with equity-focused subgroup analysis by neighborhood and rider type.
- Constructed a student-by-month administrative panel and specified a DiD model with triple interaction terms to test for a chilling effect on Boston Family Days participation; identified directional evidence of differential under-participation among East Boston and non-English-speaking households, with findings informing equity-focused follow-up.
- Designed and executed a comparative labor-market analysis benchmarking Boston against 6 peer metros using BLS employment, wage, and participation data; synthesized multi-source findings into a structured analytical report for city economic planning.

### Circadian Connect, Mumbai, India

Feb 2024 – May 2024

#### Research Intern

- Co-authored a policy brief synthesizing 30+ academic sources on Digital Financial Inclusion of Women across 7 Global South economies; produced for a paid Kolabtree engagement using a Zotero-managed systematic literature review protocol.
- Designed a mixed-methods comparative research study combining quantitative data analysis with qualitative evidence synthesis across diverse national and institutional contexts.
- Co-developed 4 evidence-based technical proposals for government STEM tenders, incorporating research-grounded needs assessments, program logic models, and measurable outcome indicators; advanced to Round 2 for a neonatal health initiative.

### Aditya Process, Mumbai, India

May 2023 – Jan 2024

#### Operations Head

- Conducted an internal audit identifying process failures and financial discrepancies; designed and implemented corrective controls and monitoring protocols.
- Managed operations, vendor relationships, and client accounts for a 25+ person organization; oversaw budget planning and reporting.
- Negotiated and acquired 3+ new B2B client contracts through structured profitability analysis, contributing to a 15% increase in annual revenue.

### Pratham Foundation, Remote

Sep 2021 – Oct 2021

#### Communications Consultant

- Administered 100+ structured household surveys across Uttar Pradesh using Pratham's ASER methodology to evaluate COVID-era education access barriers; contributed primary field data to a national policy study on learning outcomes and program reach.

## EDUCATION

---

### Northeastern University, Boston, MA

Sep 2024 – May 2026

M.S. Economics | Minor: Data Science | GPA: 3.389

Courses: *Econometrics, Macroeconomic Theory, Mathematics & Statistics for Economics, Data Analytics.*

Research: "Demographics and Real Interest Rates Across Countries and Over Time" (Carvalho et al., 2025)

### NMIMS, Mumbai, India

Aug 2020 – Apr 2023

BSc Economics | Minor: Finance

Courses: *Econometrics, Research Methods & Writing, International Economics, Game Theory.*

Research: "Global Economic Downturn of 2007" (2022); "Economics of Disasters" (2021)

## SKILLS

---

Analytical: Econometric modeling, causal inference (DiD, IV, RD, PSM), quasi-experimental research design, program evaluation, systematic literature review, survey design, primary data collection, mixed-methods research, panel data analysis, policy brief writing, academic writing, dynamic optimization.

Tools: R, Stata, Python, Microsoft Excel (advanced), Zotero, Tableau.

Languages: English, Hindi, Gujarati; learning Spanish via Duolingo.
